

## MYLAR MIRROR RE-SKIN SERVICE

Q4 is a highly experienced provider of world-class mirror re-skin services.

Utilizing a unique and proprietary re-skinning technique, Q4 has set a new standard for geometric accuracy within the industry. Drawing on the resources of a highly experienced engineering mirror team, and utilizing patented re-skin technology, Q4 has successfully carried out numerous re-skins on all makes and models of metalized film mirrors.

Q4 is able to mobilize experienced resources for short notice re-skin requirements in any location around the world. With a significant stock of Mylar held in-house, Q4 is able to deliver a high performance, time-efficient and cost-effective re-skin service.

To complement its premier re-skin capabilities, Q4 is able to support additional metalized mirror services, such as mirror repairs and washes, as a cost-effective maintenance option.

Q4 prides itself on unmatched levels of customer service, delivering high performance, world-class and cost-effective solutions to the simulation industry.
